

Dear sirs: Concerning proceeding 02-278, the telephone privacy law, please do not change it. The Indiana law works exceedingly well and we Indiana residents are very pleased with it. Rather than change it, it should be made a national standard. It has cut my telemarketer calls from several a day to None. With the obvious exception of those idiotic political phone calls during the recent campaign. The only change I want to see would be to outlaw those as well. Thanks you.
